

Course Syllabus Part I

CSD 340 Web Development with HTML and CSS

3 credit hours

Course Description

This course examines the fundamentals specific to web development. Topics will include web standards, accessibility/usability, and the markup languages, which serve as the foundation for web development: Hypertext Markup Language 5 (HTML5), Cascading Style Sheets (CSS), and Extensible Markup Language (XML). Students work with these languages at a basic level, learning the essential structures, coding conventions, and best practices associated with the effective use of HTML5 and CSS in modern web-development environments.

Course Prerequisites

None

Course Skills

- Develop web pages using HTML5, CSS and XML to meet project requirements.
 - Design, document, and debug HTML.
 - Critique web page design elements to promote alignment with contemporary style and best practices.
-

Course Objectives

Students who successfully complete this course should be able to:

- Write HTML and CSS code to create web pages.
 - Discuss web development tools.
 - Apply critical thinking to issues associated with web pages.
-

Grading Scale

93 – 100% = A	87 – 89% = B+	77 – 79% = C+	67 – 69% = D+
90 – 92% = A-	83 – 86% = B	73 – 76% = C	63 – 66% = D
	80 – 82% = B-	70 – 72% = C-	60 – 62% = D-
			0 – 59% = F

Topic Outline

- I. HTML & CSS
 - A. Page structure
 - B. Semantic markup
 - C. Browser compatibility
- II. Web development tools
 - A. Text editors and extensions
 - B. Browser tools
 - C. Version control
- III. Web development processes and topics
 - A. Design process
 - B. Atomic Design
 - C. Pattern Libraries
 - D. Responsive Design
